SOLID SURFACE BENCHTOPS

Impeccable solid surface benchtops for the home

On the leading edge of kitchen fashion, Amorini supplies a range of high quality worktop products from modern European designers and manufacturers.

Mirostone is a range of durable solid surface benchtops that have all the beauty and feel of natural stone combined with exceptional practicality. Mirostone is the perfect surface for domestic kitchens, but is equally at home in the bathroom or laundry. Mirostone can be safely installed in your home using standard woodworking tools. So Mirostone successfully avoids all the time consuming delays and inconvenience of other surfaces.

Mirostone's colourful designs are not just skin deep, they run consistently throughout its 20mm thickness. So now you can have some uniquely stylish and practical worksurface features. Mirostone is a modified acrylic meaning unlike stone composites and other surfaces to the market, it can be repaired and renewed with ease.

Mirostone is a completely safe surface on which to prepare and eat food. Mirostone is easy to clean and waterproof so harmful germs are prevented from being harboured on the surface. Because Mirostone is a solid work surface with no chipboard core, it is completely waterproof and hygienic making it the perfect surface for your kitchens, laundries and vanities.

SOLID SURFACE BENCHTOPS

Care and Daily Use Guidelines

Everyday Cleaning and General Care

Spills

Mirostone[®] is a non-porous surface meaning that it is water and stain resistant. If you do spill something on your surface we recommend wiping the worktops with warm soapy water and a damp cloth.

In addition, Selleys Sugar Soap Everyday Wall & Surface Cleaning Wipes are specially formulated to remove stubborn stains on your worktops.

Scratches

Whilst Mirostone[®] is tough, it is not indestructible. Use of the product outside of the guidelines referred to in the installation guide can cause unnecessary damage. Like all worktop materials, Mirostone can develop fine abrasion marks in normal daily use, which can be removed. We always recommend using a cutting board when preparing food and never cutting directly on the Mirostone[®] surface to avoid blunting kitchen knives or damaging the surface of your worktop. If you have crockery that has rough or unfinished surfaces lift it across your worktop and avoid sliding.

Heat Resistance

Mirostone[®] is heat resistant, however like most solid surface worktop materials Mirostone[®] can be damaged by sudden rapid surface temperature changes. We always recommend placing hot pots, oven trays and fry pans onto a wooden chopping board or similar object to absorb the heat. We also recommend that electric fry pans and slow cookers are also used on a similar object and not directly on the worktop as these can also produce extremely high levels of heat.

10 year limited warranty

We are confident in the quality of Mirostone solid surfaces. To ensure your satisfaction, we are proud to offer our 10 year limited warranty for domestic homeowners. It's your assurance that your Mirostone solid surfaces will maintain their long term value.
