

MEGANITE®

FREE of Silica Dust_Project Safety and Health with MEGANITE Acrylic Solid Surfaces

Government Safety Warning has been issued regarding exposure to Crystalline Silica dust contained in engineered stone products. The Crystalline Silica dust is generated in workplace mechanical processes. And caused deadly health issues. Major class action lawsuits emerging globally.

As an Acrylic solid surface, MEGANITE does not have Crystalline Silica as an ingredient nor is it used in any part of the manufacturing process. MEGANITE does not present these same critical exposure issues, and it is GreenGuard and NSF-51 Certified.

For more information, please refer to SAFE WORK AUSTRALIA at www.safeworkaustralia.gov.au/silica

If any questions, contact your Meganite solid surface representatives, or email us at info@meganite.com, more info could be found at www.meganite.com.
