

On the leading edge of kitchen fashion, Amorini supplies a range of high-quality worktop products from modern European designers and manufacturers.

IMPECCABLE
SOLID
SURFACE
BENCHTOPS
FOR THE
HOME

Mirostone® worktops offer more than just surface beauty. The vibrant designs run consistently throughout their 20mm thickness, providing stylish and practical features without the presence of crystalline silica.

As a modified acrylic, Mirostone® can be repaired and renewed easily, unlike stone composites. Its solid structure without a chipboard core makes it completely waterproof and ideal for kitchens, laundries, and vanities.

Additionally, Mirostone® is a safe and easy-to-clean surface that prevents germ harbouring due to its waterproof nature, making it perfect for food preparation areas.

-  20mm thickness
-  Waterproof
-  Stain resistant
-  Easy installation
-  Easy repairs & renewal
-  Hygienic surface
- 10** 10 year limited warranty
-  Manufactured to your specified sizing

Everyday Cleaning and General Care

Spills

Mirostone® is a non-porous surface, which means it is water and stain resistant. If something spills on the surface, we recommend wiping the worktops with warm soapy water and a damp cloth.

Additionally, Selleys Sugar Soap Everyday Wall & Surface Cleaning Wipes are specially formulated to remove stubborn stains from your worktops.

Scratches

Mirostone® is durable but not indestructible. Using the product in ways not outlined in the installation guide can cause damage. Like all worktop materials, Mirostone can develop fine abrasion marks with normal use, but these can be removed.

It's best to use a cutting board when preparing food and avoid cutting directly on the Mirostone® surface to prevent damage to the worktop or kitchen knives. When placing crockery on the worktop, ensure that it has smooth surfaces to avoid scratching.

Heat Resistance

Mirostone® is heat resistant. However, like most solid surface worktop materials, Mirostone® can be damaged by sudden rapid surface temperature changes.

We always recommend placing hot pots, oven trays, and fry pans onto a wooden chopping board or similar object to absorb the heat. We also recommend using electric fry pans and slow cookers on a similar object and not directly on the worktop, as these can also produce extremely high levels of heat.

10 year limited warranty

We have full confidence in the quality of Mirostone solid surfaces. To ensure your satisfaction, we are proud to offer our 10-year limited warranty for domestic homeowners.

This warranty serves as your assurance that your Mirostone solid surfaces will maintain their long-term value.
